

Terms of Reference for the Sustainable Built Environment Investor Network

The Sustainable Built Environment Investor Network is a coalition of investors committed to advancing sustainability in urban development and construction practices. The network acts as a platform for education, exchange, and connection on issues related to sustainable urban planning, green building practices, and responsible infrastructure development.

Objectives

- Enhance investor understanding of sustainable urban development, green building practices, and emergent sustainable technologies.
- Promote activities that support the integration of sustainability throughout the investment chain, including policy consultation participation and innovative urban planning approaches.

Membership

Membership is open to asset managers, asset owners, and investment service providers who are dedicated to integrating sustainability principles into their investment and stewardship practices.

Roles and Responsibilities

- Coordinators
 - Oversee the network's activities.
 - Provide resources and support for knowledge expansion and engagement in sustainable practices.
 - Disseminate information on collaborative activities and projects relevant to the network's objectives.
- Members
 - Actively participate in knowledge exchange and collaborative activities.
 - Engage in discussions and initiatives that promote sustainability in the built environment.
 - Share information and experiences to aid collective learning and action.

Activities and Operations

- Sessions for information sharing on sustainable urban development and technologies.
- Dissemination of written resources, case studies, and public information on sustainable projects.
- Support for engagements with companies and policy makers to advocate for sustainability in the investment chain.

Governance

The coordinators will be responsible for overseeing the networks' work.

Communication

The network will maintain a digital platform for communication among members, including forums for discussion, a repository of resources, and announcements of upcoming activities. Sessions can be arranged as needed for specific projects or discussions. Meetings can be conducted virtually to facilitate broad participation.

Review and Evaluation

Reviews will be conducted on an ad hoc basis to evaluate the network's impact, adapt objectives as needed, and plan activities.
